Seed and Agricultural Commodities Merchants

NEWSLETTER MAY/JUNE 2019

Dear Customers,

Well Autumn has finally arrived in SE Queensland, a very welcome event considering the Summer Queenslanders have endured. Now three months since the worst of the floods yet effected families are still very much inconvenienced.

Despite the effects of drought, fires and floods, we are still able to procure good stocks of native tree and shrub seed and of importance, grass and legume seed for the mining revegetation industry, so some good, despite the appalling impacts of the drought.

The rains we have received since late March are pointing to a good Acacia seed set so as long as we get some follow up rain, we should be able to replace exhausted Acacia stocks in the months ahead. These conditions are also assisting us with Castenospermum australe (Blackbean) crops, collections against export orders begin in earnest next week.

My thanks for your support, trusting you find interest from the impending collection details.

Kind regards

Mike

MAY / JUNE SPECIALS

Acmena hemilampra $130.00/1000 seeds

Acmena smithii $69.50/1000 seeds

AustraHort
Seed Merchants

AustraHort Pty Limited – Revegetation Specialists

AustraHort Pty Limited, a company with a world-wide presence, known for its products and seed services, a specialty of native and exotic tree, shrub, grass and legume seed.

We are committed suppliers to the mine and roadside revegetation sectors and are bulk stockists of primary colonising Acacia and Eucalyptus species and many others of the Bowen and Galilee Basins.

The company ethos is the pursuit of excellence in the quality of seed we sell and the services that we provide, in the technology we employ and our restless pursuit of opportunities that can lead to product commercialisation over time.

The company directly employs six expert staff in its Cleveland premises but indirectly employs many more in direct and indirect services for seed collection.

Seeds are stored in atmosphere controlled cool rooms for optimal viability.
