

NEWSLETTER MARCH / APRIL 2019

Dear Customers,

In this edition, we are pleased to advise the listing a number of new lines, attractively priced, tree and shrub species that will be suited to most Australian environs. Please consider and advise any comments you think may be pertinent.

Seed business continues at a lower pace than we are accustomed to. The summer weather in Queensland has no doubt contributed to the deferral of mine site seed sowing programs but it is hoped that some good will come from the fire, flood disasters, disasters that fell on top of prolonged drought. It is good that we continue in investing in seed crops where we can for prima facie, the above conditions will make life difficult in the foreseeable future.

Our thanks for your continuing support!

Kind regards

Mike

March / April Specials

EXTRA!

Brilliant news for Eucalyptus pulverulenta Baby Blue users, we are anticipating an Australian collection in April, thus seed availability in May. Of course, no details known at this juncture but it would help if nurseries and customers could contact us advising your interest.
